Jakarta

AI & ML Engineer | Full-Stack Developer | Database Administrator | Application Development | UI/UX

Undergraduate in Information Systems with a 3.80/4.00 GPA and hands-on experience in AI applications, full-stack development, data science, and UI/UX design. Skilled in web and mobile application development, machine learning, LLM evaluation, and prompt engineering. Currently developing an AI-powered personal finance application using Flutter, Dart, Isar, and LLM technologies (Qwen2 1.5B with QLoRA fine-tuning). Published machine learning researcher with 96.5% accuracy in stroke risk classification. Dedicated to delivering functional, user-focused digital solutions.

Education Level

Universitas Bina Sarana Informatika - Jakarta

Bachelor of Information Systems - Seventh Semester, 3.80/4.00

Work Experiences

SMKN 10 BEKASI CITY - Bekasi

Aug 2022 - Oct 2022

3D Desginer Internship

Creative and meticulous 3D Printing Designer specializing in 3D logos, custom objects, and personalized products. Experienced in designing modern, premium house address plaques, product prototypes, and other high-quality custom items using advanced 3D printing technology.

PT Akebono Brake Astra Indonesia - East Jakarta

Jun 2022 - Aug 2022

Mechanical Engineer Internship

Developed and implemented mechanical jigs that reduced production line setup time by 15%. Installed and configured safety sensors to ensure compliance with workplace safety standards. Collaborated with the engineering team to troubleshoot mechanical issues and implement corrective actions.

Project/Relevant Experiences

Pastel Wallet – AI-Powered Personal Finance Consultant

Aug 2026 - Present

AI & Mobile Application Developer

Developing an AI-powered personal finance application with Flutter and Dart, integrating comprehensive financial management tools, dynamic data visualization capabilities, and a well-structured user experience.

- Developing the Android application with Flutter and Dart, including financial management features, data visualization, and a structured user experience for personal finance management.
- Implementing Isar and a Financial Engine as the source of truth for storing, processing, and providing verified financial context to the application and AI Consultant.
- Developing an AI Consultant using Qwen2 1.5B with QLoRA fine-tuning and prompt engineering to generate relevant, actionable, and Indonesian-language financial insights.
- Evaluating AI reliability through financial grounding, structured output, schema validation, missing-data handling, and anti-hallucination testing using main and unseen test cases.

Motiv8 Coffeeshop

Apr 2026 - May 2026

Full stack Developer

Developed a web-based system incorporating QR codes to enable digital menu selection for Motiv8 Coffee Shop in East Jakarta, enhancing customer experience and operational efficiency. www.motiv8.fun

- Designed and developed an interactive menu interface with dynamic category-based filtering for enhanced user navigation.
- Implemented a real-time shopping cart system to enable seamless and efficient order management.
- Integrated digital QR code functionality to offer customers quick and convenient access to the menu.
- Created a Decision Support System (DSS) page providing personalized menu recommendations utilizing the Simple Additive Weighting (SAW) method.

Penerapan Random Forest Untuk Klasifikasi Risiko Penyakit Stroke Pada Rentang Usia 40-85 Tahun - International

Sep 2025 - Dec 2025

Data Mining Researcher

The Random Forest algorithm classified stroke risk in individuals aged 40 to 85 years with an accuracy of 96.5% and an AUC of 0.914, outperforming Logistic Regression, Decision Trees, SVM, and Naive Bayes despite extreme class imbalance. www.jurnal.ikhafi.or.id/index.php/jukomika/article/view/617

- Created a stroke risk classification model utilizing Random Forest on imbalanced clinical data, consisting of 2,875 records from individuals aged 40 to 85.
- Processed and standardized the Kaggle stroke dataset, including numerical features such as age, glucose level, and BMI.
- Assessed model performance using 10-fold stratified cross-validation in Orange Data Mining.
- Benchmarked Random Forest against Logistic Regression, Decision Tree, SVM, and Naive Bayes, achieving 96.5% accuracy and AUC 0.914.
- Conducted feature importance analysis to identify key predictors of stroke risk.
- Published in international journal: www.jurnal.ikhafi.or.id/index.php/jukomika/article/view/617

corefest

Apr 2024 - May 2024

UI/UX Designer

Developed a mobile ticket booking application designed to streamline the reservation process, improve operational efficiency, and deliver an enhanced, user-friendly experience.

- Designed user flows, wireframes, and interactive prototypes to facilitate a seamless ticket purchasing experience.
- Established consistent design systems that included color palettes, typography, icons, and reusable user interface components.
- Developed intuitive and user-centered mobile interface designs utilizing Figma.
- Conducted usability evaluations and design iterations based on user feedback to enhance overall user satisfaction and accessibility.
- Collaborated with team members to translate business requirements into functional and visually appealing designs.

Skills, Certications & Tools

- **Certificate Introduction of Artificial Intelligence** 🎓 (2026): The IBM SkillsBuild Certificate in Artificial Intelligence Fundamentals provides comprehensive knowledge on the core concepts, principles, and applications of AI. This program covers essential topics such as machine learning, natural language processing, computer vision, and ethical considerations in AI, equipping learners with the foundational skills necessary to understand and work with AI technologies effectively.
- **Certificatate Database Administration BNSP** 🎓 (2026): Certified in database administration, covering database design, SQL implementation, security management, backup and recovery, performance optimization, and maintenance of relational database systems.
- **IT Bootcamp & Workshop** 🎓 (2025): Participated in an intensive IT Bootcamp and workshops, gaining practical experience in software development, UI/UX design, database management, and project collaboration through real-world case studies and hands-on projects.
- **Industry-Based Competency Test** 🎓 (2024): Demonstrated competency in database testing and administration by utilizing MySQL and phpMyAdmin to manage database structures, validate data integrity, execute SQL operations, and support application functionality testing.
- **Hard Skills:** AI & LLM: Prompt Engineering, Large Language Models (LLMs), AI Application Development, LLM Evaluation, QLoRA Fine-Tuning, Financial Grounding, Structured Output, Schema Validation, Anti-Hallucination Evaluation.
Software Development: Full-Stack Development, Mobile Application Development, API Integration, Database Design & Management, Application Maintenance, Troubleshooting, System Optimization.
Data & Machine Learning: Machine Learning, Data Mining, Data Processing, Data Visualization, Classification Modeling, Feature Analysis, Model Evaluation.
UI/UX Design: User Flow, Information Architecture, Wireframing, Prototyping, Design Systems, Usability Evaluation, User-Centered Design.
- **Soft Skills:** Disciplined, assertive, effective communicator, strong team player, detail-oriented and situationally aware, with excellent time management skills.
- **Tools:** AI & LLM: OpenAI, Anthropic Claude, Google Gemini, Ollama, Hugging Face, Hugging Face Transformers, LlamaIndex, LLM.
Development: Visual Studio Code, Flutter, Dart, Android Studio, Laravel, PHP, JavaScript, Node.js, Python, Docker, Git Bash, Streamlit, Ms Project.
Data, ML & Database: Scikit-learn, Orange Data Mining, Google Colab, MySQL, Isar Database, phpMyAdmin.
Design: Canva, Draw.io, Whimsical, Figma, DB Diagram.
