Jakarta

Full-stack developer and UI/UX designer with 2+ years of experience in web development and user-centered design. Skilled in responsive applications using Laravel and Node.js and creating intuitive interfaces with Figma. Experienced in data mining and machine learning, achieving 96.5% accuracy in classification models. Currently pursuing a Bachelor's in Information Systems with a 3.80 GPA.n Systems with a GPA of 3.80.

Education Level

Universitas Bina Sarana Informatika - Jakarta
Bachelor of Information Systems - Ongoing, 3.80/4.00

Work Experiences

- SMKN 10 BEKASI CITY - Bekasi

Aug 2022 - Oct 2022

3D Desginer Internship

Creative and meticulous 3D Printing Designer specializing in 3D logos, custom objects, and personalized products. Experienced in designing modern, premium house address plaques, product prototypes, and other high-quality custom items using advanced 3D printing technology.
- PT Akebono Brake Astra Indonesia - East Jakarta

Jun 2022 - Aug 2022

Mechanical Engineer Internship

Developed and implemented mechanical jigs that reduced production line setup time by 15%. Installed and configured safety sensors to ensure compliance with workplace safety standards. Collaborated with the engineering team to troubleshoot mechanical issues and implement corrective actions.

Project/Relevant Experiences

- Motiv8 Coffeeshop - Web Programming Project

Apr 2026 - May 2026

Full stack Developer

A web-based system using QR codes for digital menu selection at Motiv8 Coffee Shop, East Jakarta. www.motiv8.fun

- Developed an interactive menu page with dynamic category-based filtering.
 - Implemented a real-time shopping cart system for seamless order management.
 - Integrated digital QR code technology to provide customers with quick and convenient access to the menu.
 - Created a Decision Support System (DSS) page that features menu recommendations using the Simple Additive Weighting (SAW) method.
- corefest - East Jakarta

Apr 2024 - May 2024

UI/UX Designer

Created a mobile ticket booking application to simplify the reservation process and enhance user experience.

- Designed user flows, wireframes, and interactive prototypes to facilitate a seamless ticket purchasing experience.
 - Established consistent design systems that included color palettes, typography, icons, and reusable user interface components.
 - Developed intuitive and user-centered mobile interface designs utilizing Figma.
 - Conducted usability evaluations and design iterations based on user feedback to enhance overall user satisfaction and accessibility.
 - Collaborated with team members to translate business requirements into functional and visually appealing designs.
- Penerapan Random Forest Untuk Klasifikasi Risiko Penyakit Stroke Pada Rentang Usia 40-85 Tahun - International

Sep 2025 - Dec 2025

Data Mining

The Random Forest algorithm classified stroke risk in individuals aged 40 to 85 years with an accuracy of 96.5% and an AUC of 0.914, outperforming Logistic Regression, Decision Trees, SVM, and Naive Bayes despite extreme class imbalance. www.jurnal.ikhafi.or.id/index.php/jukomika/article/view/617

- Created a stroke risk classification model utilizing Random Forest on imbalanced clinical data, consisting of 2,875 records from individuals aged 40 to 85.
 - Processed and standardized the Kaggle stroke dataset, including numerical features such as age, glucose level, and BMI.
 - I assessed the model's performance using 10-fold stratified cross-validation in Orange Data Mining.
 - The Random Forest algorithm was benchmarked against four baseline algorithms: Logistic Regression, Decision Tree, Support Vector Machine (SVM), and Naive Bayes. This comparison yielded an impressive accuracy rate of 96.5%.
 - I conducted an analysis on feature importance to identify the key predictors of stroke risk.

Skills, Achievements & Other Experience

- **Certificatate of Competence** (2026): Certified in database administration, covering database design, SQL implementation, security management, backup and recovery, performance optimization, and maintenance of relational database systems.
- **IT Bootcamp & Workshop** 🎓 (2025): Participated in an intensive IT Bootcamp and workshops, gaining practical experience in software development, UI/UX design, database management, and project collaboration through real-world case studies and hands-on projects.
- **Industry-Based Competency Test** 🎓 (2024): Demonstrated competency in database testing and administration by utilizing MySQL and phpMyAdmin to manage database structures, validate data integrity, execute SQL operations, and support application functionality testing.
- **Soft Skills**: Disciplined, assertive, effective communicator, strong team player, detail-oriented and situationally aware, with excellent time management skills.
- **Hard Skills - Development**: Skilled in website and application development, database design and management, website maintenance, and system optimization. Experienced in building scalable digital solutions, enhancing application and website performance, troubleshooting technical issues, and ensuring reliable, user-friendly, and efficient system functionality.
- **Hard Skills - Design**: Experienced in designing digital products from initial concept to interactive prototypes, including creating user flows, information architecture, wireframes, high-fidelity UI designs, and functional prototypes. Skilled in planning website structures and user journeys to ensure intuitive navigation and an optimal user experience. Additionally, proficient in developing 3D designs and models for visualization, product concepts, and technical design purposes.
- **Tools Development**: Visual Studio Code, Laravel, phpMyAdmin, MySQL, Python, JavaScript, PHP, Android Studio, Flutter Dart, Node.js, docker, git bash
- **Tools Design**: Figma, Draw.io, Whimsical, Canva, Mastercam X5, AutoCAD
